

The VOYZX Story

The VOYZX Fine Art Project was founded in 2017 by Vladimir Kolosov – a multi-educated artist. Since early childhood Vladimir has been closely connected with music, fine arts, and later mathematics and business and all it became an integral part of his life. The idea of creating an art gallery specialized on contemporary surrealism and some other related styles was born shortly after his moving to Canada in 2006 - when Vladimir became acquainted more deeply with the culture and traditions of the West Coast. The unique nature and cultural heritage of the West Coast had always attracted surrealists such as Andre Breton, Max Ernst, Wolfgang Paalen, Man Ray, and others. The West Coast was also the birthplace of the West Coast Surrealist Group (WCSG), which was active in 70's and 80's. Some of its former members, including the founder of the WCSG - Robert Davidson, have joined the VOYZX Fine Art Project.

However, over time, the idea of a traditional gallery has undergone many transformations. It took almost a decade of research, analysis, and development of the most optimal model for the organization; and the result - VOYZX Fine Art Project was created , flexible, sustainable, and efficient platform that can promote ideas and concepts of Contemporary Art related to selected styles locally as well as globally. Vladimir's dream is to create a hub dedicated to the Contemporary Art rooted from these selected styles. A hub that will attract artists working in these styles and its collectors to Vancouver, B.C.

It is important to mention also the role of late Barry Gordon, a prominent surrealist from California. He had been a like-minded friend and colleague to Vladimir and has helped in shaping the vision of VOYZX up until he passed away in January 2020. Barry was the former owner of an art gallery in Beverly Hills, CA, and came in contact with Vladimir after Vladimir's presentation of Canadian Surrealism in San Diego in 2015. Despite having never met in person, the two artists frequently discussed the concept of VOYZX and its future.

Step by step Vladimir's dream is coming true. The VOYZX Fine Art Project works with living artists at different stages of their career, all of whom demonstrate extraordinary vision and original ideas.
